Features of Interest:

Kar Vinkara is the seat of Lord Clarin Darhelim, the Earl Kinen, and the heart of the isolated but prosperous sheep region of Kinenshire.

Noneth Bridge is an ancient Khundari structure, believed to have been constructed late in the Age of Chaos, spanning the Noneth River, the northern border between Nolkior and the Wildlands of the central Sarajis (Savage) Mountains. It is the southern terminus of the Fur Road, and a thriving, and well-garrisoned, trading post takes in the furs, amber, herbs, wild beasts and other raw materials the tribesfolk trade in, and provides the barbarians with the artifacts of civilization.

Kotara Swamp is a seldom visited marshland of treacherous bogs and fetid plant life. A few hardy souls from the nearby manors of Talence and Varya make occasional forays into the swamp to harvest rare plants, and fish for the elusive kotaran catfish, considered a delicacy in the south.
